

OPTIMIZE YOUR WATER QUALITY TO IMPROVE TURF PERFORMANCE

Every acre-foot matters. Rainmaker.Earth helps you get more from every drop.

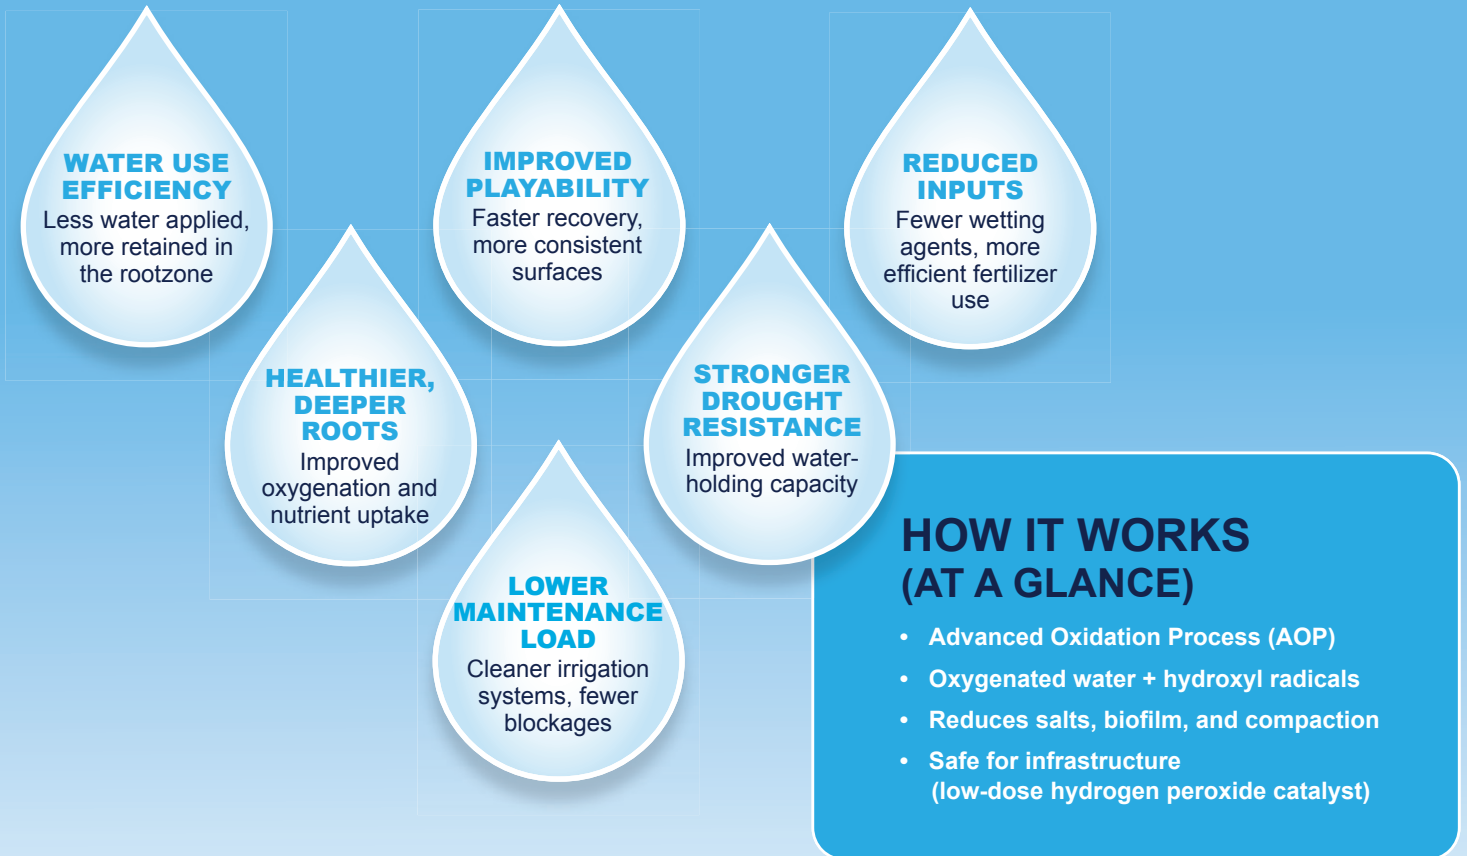

Rainmaker.Earth improves how water moves through soil — unlocking healthier turf, deeper roots, and more efficient water use.

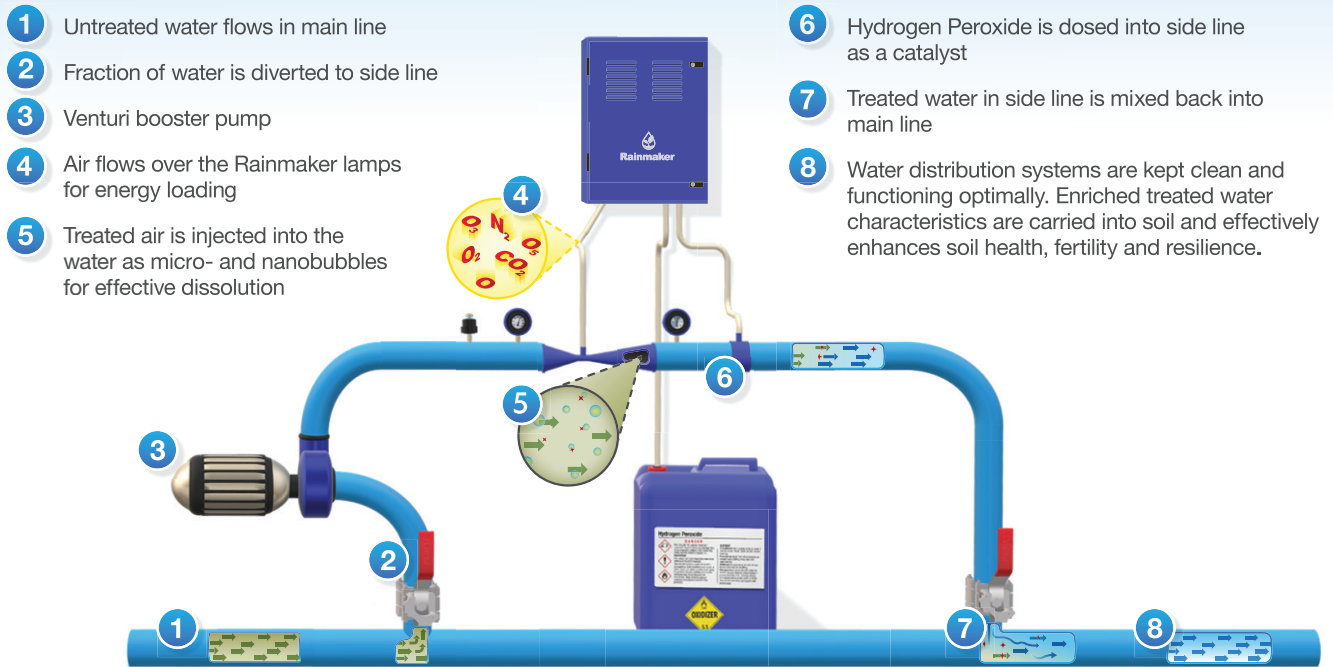

Better turf. Less water. Stronger roots.

What Optimized Water Delivers

Rainmaker.Earth AOP (ADVANCED OXIDIZATION PROCESS)

HYDROGEN PEROXIDE CATALYST

A low dose of hydrogen peroxide (2 PPM @ 50% concentration) induces a chemical reaction with the treated air that creates Hydroxyl Radicals that reduces or eliminates biofilm in the lines, reducing pathogens. The treated water will not harm the irrigation infrastructure.

Peninsula Golf & Country Club

SAN MATEO, CALIFORNIA

"Rainmaker.Earth turned our irrigation system into a performance tool."

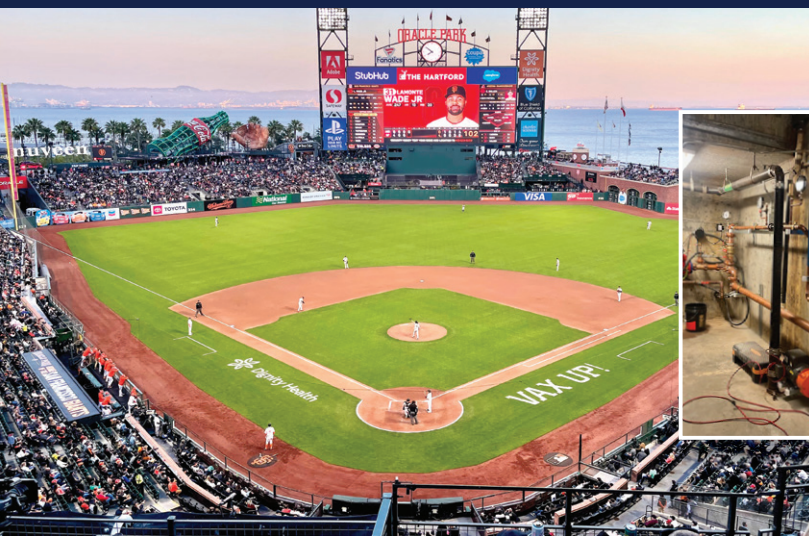

[Joe Budinich](#), Director of Agronomy

Priddis Greens Golf & Country Club

ALBERTA, CANADA

"After two years of running the Rainmaker system, we've seen a positive improvement in both turf health and overall playability. The results have been so strong that we're now installing it property-wide across all three pumphouses."

[Chris Prodahl](#), Golf Course Manager

Oracle Park San Francisco Giants

SAN FRANCISCO, CALIFORNIA

"We've seen increased root mass, improved penetrometer readings, and faster recovery times in just two months."

[Gregory T Elliott](#), Senior Director, Field Operations

Stewart Creek Golf & Country Club

ALBERTA, CANADA

"About 30 days after installing the Rainmaker system, we had a one-inch rain event and saw a dramatic improvement in water infiltration with minimal runoff or standing water. Areas that normally suffer erosion or washouts showed little impact, and we spent about 50% less time managing erosion. It was the first time we'd seen the course respond this way."

[Sean Kjemhus](#), Director of Agronomy

Canyon Meadows Golf & Country Club

CALGARY, CANADA

Installed May 2025.

Performance will be evaluated over the course of the season to measure impacts on infiltration, playability, and turf consistency.

Paypal Park San Jose Earthquakes

SAN JOSE, CALIFORNIA, USA

Installed December 2025.

Results will be measured over the 2026 season to assess soil and turf performance.

Rainmaker.Earth transforms irrigation water from a limiting factor into a performance advantage.
